## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments see page 2, filed 7/15/03, with respect to claim 7 has been fully considered and are persuasive. The rejection of claim 7 as being anticipated by Inoue et al. has been withdrawn.

1. Applicant's arguments with respect to Yoneda, filed 7/15/03 have been fully considered but they are not persuasive. See details below.

The affidavit filed on 7/15/03 under 37 CFR 1.131 is sufficient to overcome the Yoneda reference.

The Yoneda reference is a U.S. patent or U.S. patent application publication of a pending or patented application that claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2306. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. If the reference and this application are commonly owned, the patent may be disqualified as prior art by an affidavit or declaration under 37 CFR 1.130. See MPEP § 718.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

Art Unit: 2874

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 7, 9, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent Application Publication 2002/0122623 to Yoneda.

Yoneda discloses an athermal silica based waveguide device providing a plurality of optical signals each corresponding to a port comprising:

- At least a pair of waveguides coupled to each other separated by a gap of about 2 micrometers to about 500 micrometers (Figure 6), said waveguides having a thermal coefficient larger than 0.0/Degrees Celsius (Paragraph 73)
- Another waveguide connecting said pair of waveguides having a thermal coefficient between  $-2 \times 10^{-4}$  / Celsius to  $-4 \times 10^{-4}$  / Celsius (Paragraph 73)

As to claim 9, Yoneda discloses a trapezoidal gap (Figure 3).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2874

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoneda as applied to claim 1 above.

Yoneda discloses an optical waveguide device as described in claim 7, but fails to explicitly disclose said waveguides being optical fibers.

It is well known in the art to use optical fibers as waveguides for their simplicity and cost benefits.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify Yoneda to include waveguides made of optical fiber for simplicity, cost and transmission benefits.

### ***Conclusion***

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
